

Lord of all Creation

Pastor John Hicks
First United Methodist Church

God's wisdom is seen in the making of the elephant. The four legs of the elephant all bend forward in the same direction. No other quadruped is so made. Because of this, elephants, with their great mass, can rise up from a prone position. Horses rise up from the ground on their two front legs first. Cows rise from the ground first by their hind legs.

It's amazing how our Creator God has put everything together.

Watermelons have an even number of stripes on them. Oranges have an even number of segments. An ear of corn has an even number of rows, and each stalk of wheat has an even number of grains. Every bunch of bananas has an even number of bananas, and each row decreases by one. And I've been told that ocean waves roll in on shore twenty-six per minute in all kinds of weather.

Looking around, we can see God in all creation, and realize even more fully that our Lord has an order for His creation so that it will carry out plans and purposes. How great it is to think about the way our Creator God planned everything so carefully, everything with a plan. God is all around us, evidenced in His creation. It brings to mind the words of the great hymn; "O Lord, my God, when I in awesome wonder, consider all the worlds Thy hands have made, I see the stars, I hear the rolling thunder, Thy power throughout the universe displayed..... When through the woods and forest glades I wander, and hear the birds sing sweetly in the trees.... Then sings my soul, my Savior God, to Thee; How Great Thou art, how great Thou art!"

"For since the creation of the world God's invisible qualities--His eternal power and divine nature--have been clearly seen, being understood from what has been made, so that men are without excuse." Romans 1:20.
